

MICHAEL TSERLOTIS
PHILATELIC EXPERT

24th October, 2004

CERTIFICATE

No. 04102403

1861-62 First Athens print (Coarse printings) 5 Lepta deep yellow green (MT 11Ib) block of four used on letter sent from Gytheion to Athens on 19 November 1862 and cancelled with diamond of dots "33" cancellation.

What appears to be a thin on the first stamp is most probably a thin of the lettersheet which shows similar abnormalities at other places. Impossible to check unless removed.

It is my opinion that the letter with its franking is genuine.

This certificate is made according to the statutes and to the rules of the "Association Internationale des Experts en Philatélie" and any person who makes use of this is understood to have knowledge of these statutes and rules and to agree with them.
