

PLATE BLOCKS OF THE DOAR IVRI.

The Doar Ivri issue of Israel was printed under wartime conditions without adequate provisions for paper, printing machinery, and trained personnel. A wide variation exists between printings. Sheets of stamps of various denominations were run off the machines as required. Owing to lack of machinery available it was not possible to complete a series in one value before commencing another. This necessitated numerous settings and re settings of the machinery.

The identification of any printing is given by the combination of various factors.

e.g. 5mils. Group 51, issued May 1949.

Plate number.

Paper - medium white.

Control distance.

Control. - SL - Star to left.

Serial number.

Type of Control - Slug , SL - Star to Left , SR - Star to Right , and No.

Type of paper - Thin white , Thin Yellow , Trans parent , Medium white , Thick white , Grey.

CD - Control Distance , distance in millimetres from the top of the control mark to the top edge of the stamp.

Plate number.

Sheet serial number.

This is a study of the Plate Blocks of the low values of the Doar Ivri issue.

Based on information collated by S. Rothman and Y. Tsachor and personal research.
