## PHILATELIC OPINION MIKE JACKSON

No. 00008

22 February 2012

**PHILATELIST** 

3 COTTESMORE AVENUE MELTON MOWBRAY LEICESTERSHIRE LE13 0HY ENGLAND mike@mjpublications.com

## ITEM SUBMITTED AS:

1841 2d DI cancelled by a Cork Special Maltese Cross.

## **OBSERVATIONS**

Examination of the stamp under long- and short-wave UV light (366 nm and 254 nm respectively) revealed nothing unusual. The shapes of the components of the Maltese Cross are consistent with those of Cork Special strikes from dated covers, two of which are shown for comparison. Although this particular strike is difficult to differentiate from the Ross Special, what can be seen of the diamond, the outer cross loops, and the gaps between the diamond and inner cross (the gaps are smaller in the Ross Special) indicate that it is a Cork Special obliterator. Cork is known to have sometimes produced blotchy impressions such as that on the questioned stamp. The only other Special cross with which Cork can be confused is Belfast; images of Belfast and Ross are shown for comparison.

See the Encyclopaedia of the Maltese Cross, Vol. 1, p. 47 (Belfast); p. 82 (Cork); Vol. 2, pp. 236–237 (Ross); Vol. 3, p. 371 (Belfast Addendum).

## CONCLUSION

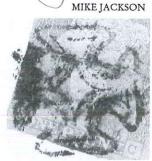

In my opinion the stamp in question is 2d Plate 3, DI, and bears a genuine Cork Special Maltese Cross cancellation.

Cork Special from cover dated 25 September 1843

QUESTIONED ITEM

Cork Special from cover dated 24 February 1844

Belfast Special

Ross Special
