VARIETES – ERRORS – MANIPULATIONS: THE FALSE “IMPERFORATES”:

1. Stamps from rejected sheets, because of lack of ink.

2. Proofs in the definite colours, **normally imperforate**

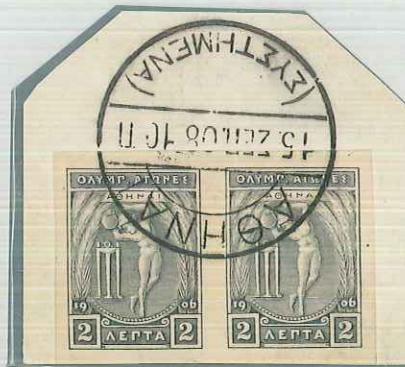

2. Stamps whose perforations were cut to simulate “**Imperforate**” stamps

DECENNIAL GAMES ATHENS 1906

Imperforate stamps from the definite colour proof sheets.

1 Drachma with faulty perforations:

1. Strip with double perforation
2. Comb displaced upwards and to the right (on fragment of R-letter); one part of the stamp was taken apart at the faulty perforation
3. Perforation displaced upwards or downwards
4. Double perforation on the left side – torn away

DECENNIAL GAMES ATHENS 1906

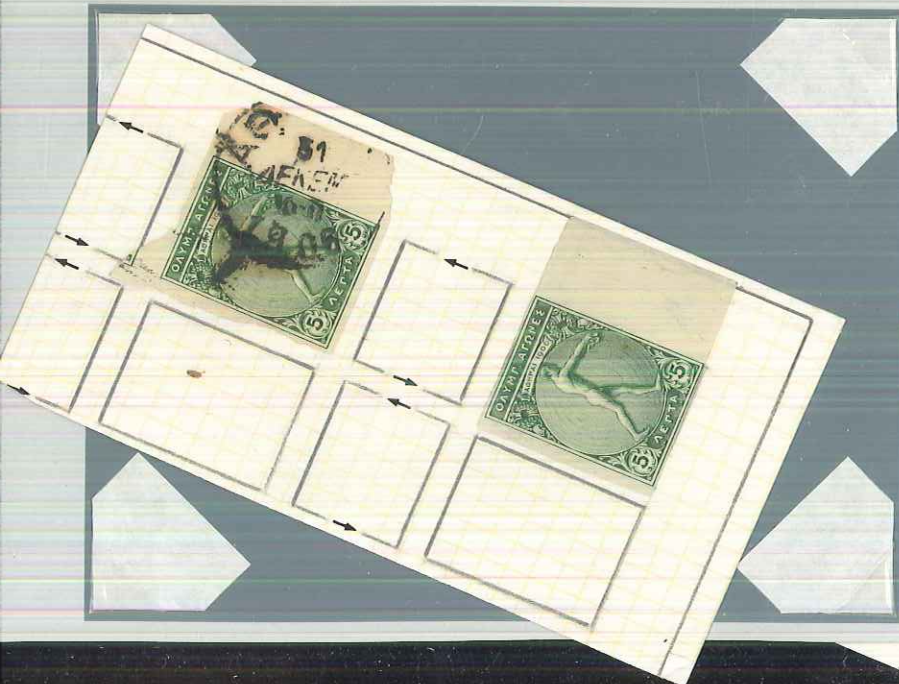

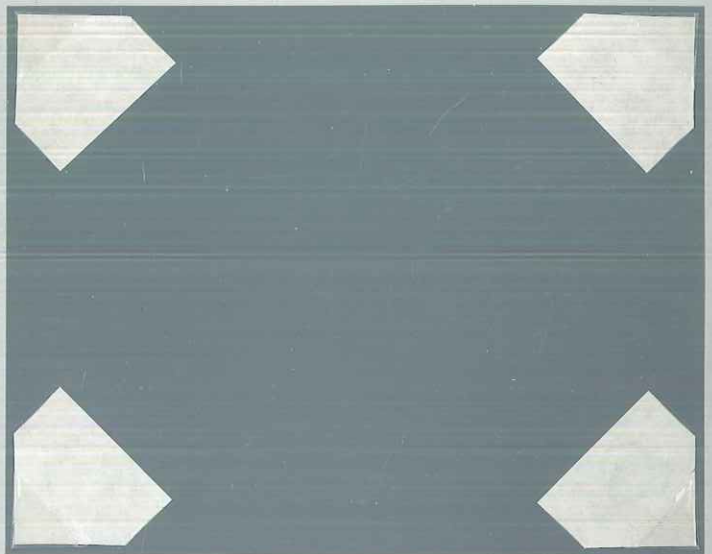

VARIETES – ERRORS – MANIPULATIONS: ADDITIONAL PERFORATIONS:

In fact, all the shown “additional” perforations were due to **double strikes** of the vertical branches of the perforation comb. Many of the “additional” perforations are associated with “shifting” of the perforation comb (shifting in all directions have been recorded).
