MINT

50 KRANS

Possibly some genuine set of 12 frames had a fraudulent 50 KRANS setting inserted, which was then used to print on paper which somehow had the genuine blue mesh

# 50 KRANS

These are very interesting. The paper does not seem quite right, although the faint network background is correct. They can be plated by the same differences as all other values - EXCEPT - there is never a tall first letter in پسته, and the lettering is always in the same position vis-à-vis the frame.

50 KRANS

1902 First Typeset Issue. Perhaps a new setting remaindered as the first had been - possibly a most elaborate forgery.

The same

Control 812

50 KRANS

The genuine stamp with forgeries to compare

No. 1.

Only 1000 of this value were printed.

These forgeries can be plated by the same frame differences as the genuine have.

The format is the same, but the paper is wrong, and the lettering is spaced differently.

This is a forged block of six, all being No. 3

The more usual forgeries are of No 2 on the plate.

No. 4

K

This is a genuine 1 Kran! With registration label and Teheran arrival mark on the front.
