Introduction

Marcus Orsi
Chief Philatelist

Dear Collectors and Friends,

We are holding our traditional Spring/Summer auction series, from June 26 to 30, 2017, which comprises five different catalogues. Please consult our web site to view or download all the catalogues at www.davidfeldman.com.

We would like to heartily thank our many hundreds of consignors from all parts of the world who have entrusted us with their collections, recognising our company's ability to present their stamps and postal history in the best way to an extensive and knowledgeable collecting public. Indeed, needless to say that without the trust and continued appetite of our passionate and active collector-clients, this sale would not be possible.

Please note that the Europe and Overseas sections are in EUROS (€), while all British Empire lots are in POUNDS STERLING (£).

This Europe & Overseas catalogue highlights important sections of Brazil, Bolivia, Great Britain, Ireland, Israel, Italy & Italian States, Romania and Turkey, all presented in over 2000 lots. Other notable highlights are extensive one-country collections and lots, plus general all world collections throughout. We will also hold a special viewing of all British Empire single lots and selected/requested large lots on June 22 at Adam House, just off the Strand in Central London. If you have a request to view a specific lot please contact Ricky Verra at ricky@davidfeldman.com and we will do our best to accommodate you.

Our clients have come to know and value our All World Collections section with many fresh lots housed in hundreds of albums and boxes. Our latest offering continues this tradition with an exceptional selection of country collections, mixed lots and general collections originating mostly from estates. Indeed, practically all of the following material has not been on the market for an average of over twenty years, which will, no doubt, add to its attractiveness for potential buyers.

It is therefore our pleasure to welcome you to Geneva, where the viewing of both small and large lots takes place from June 26th, and before that date by appointment. If you are planning to visit us, please inform us of your travel plans, and do not hesitate to ask should you need some assistance in the form of hotel reservations or other information. Frequent visitors to our auctions are quick to appreciate the extensive network of low-cost airlines offered by the nearby Geneva International Airport and the convenient proximity of the A1 motorway, located only a few minutes away. Should you not be able to view the lots at our offices, please consider that most of them, including numerous collections, are also completely scanned and available for viewing via our website www.davidfeldman.com.

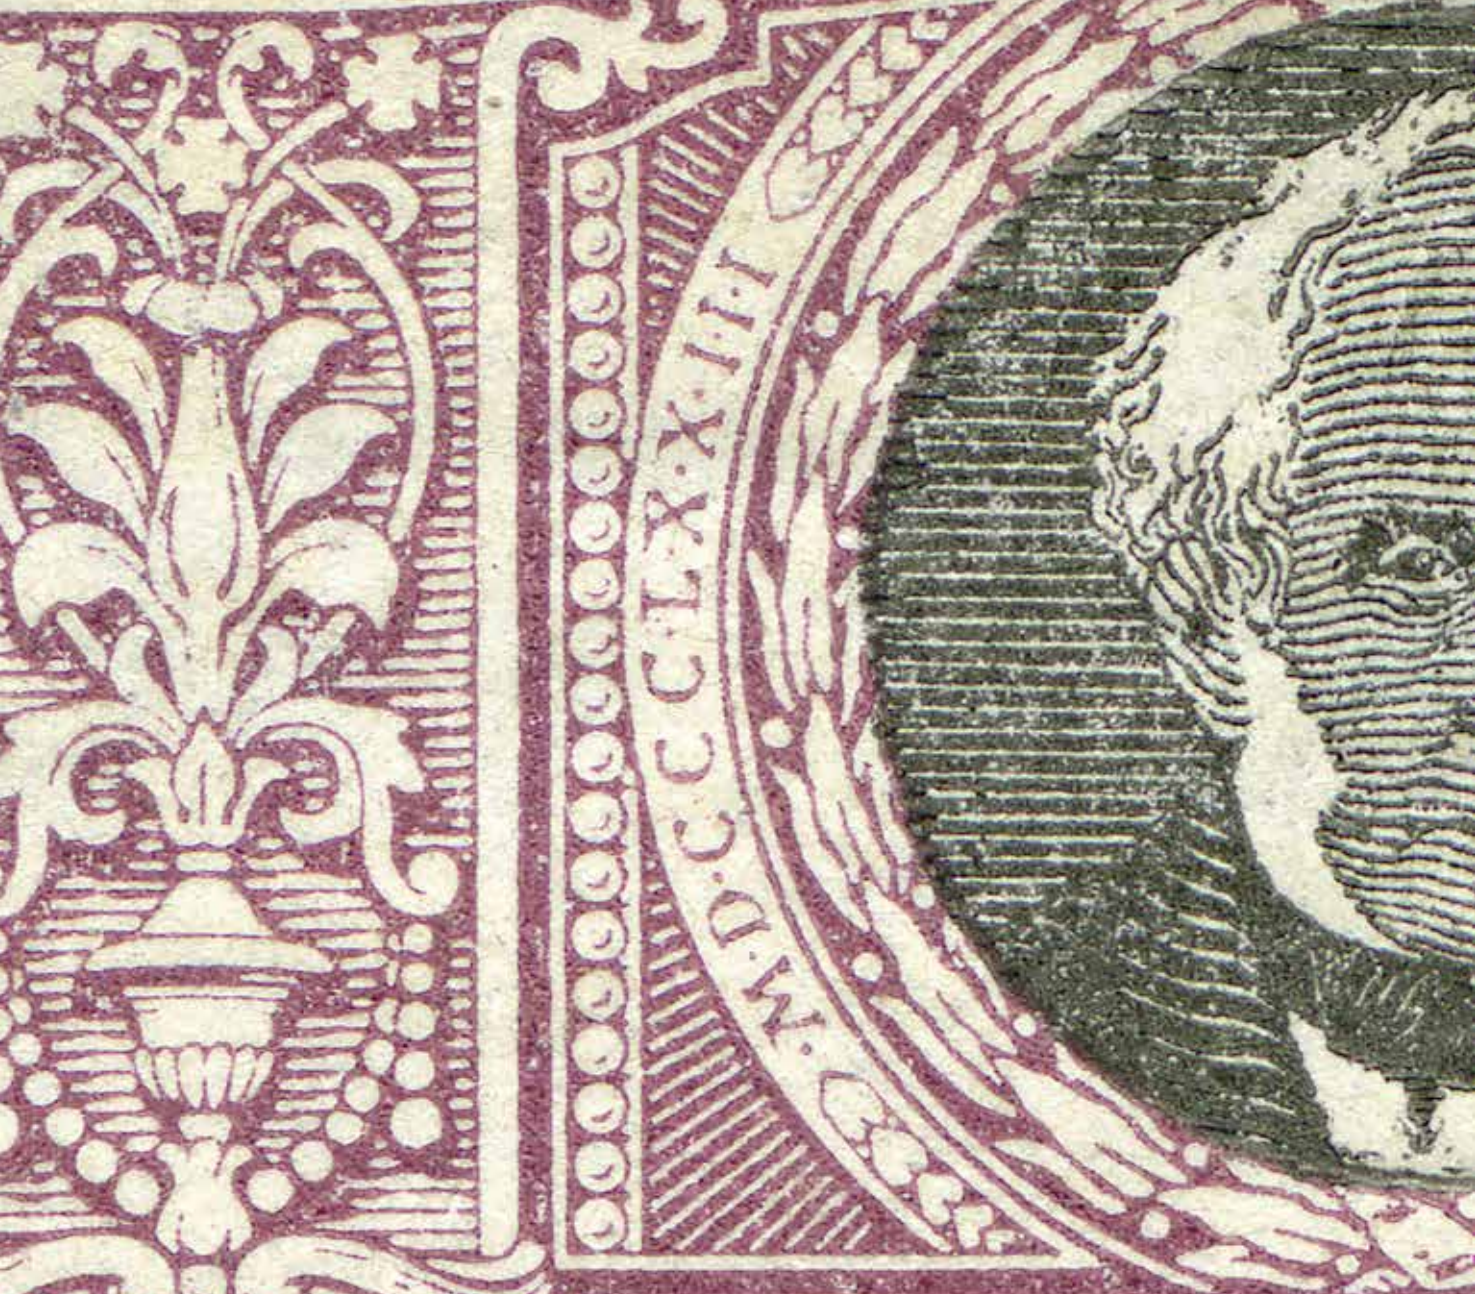

Bidding in our auctions can be made in writing via the enclosed bid form, live via Internet in the comfort of your home or office, by telephone, or indeed through an independent auction agent. Should you have any questions concerning the material presented, our conditions of sale, or any other matter, please do not hesitate to contact us – we are at your service. We wish you success with your bids and satisfaction with your purchases.

The Role of Health Stations and Lazarets in Greece

History

The prevention from the contagious diseases in Greece, such as plague and cholera, was one of the main concerns of the newly borne State, since the years of the Struggle for Independence (1821-1827).

The Mediterranean ports old practice, i.e. the opening and/or slitting of mail and its fumigation by sulphur or dipping in vinegar was the only known protection measure. This procedure was applied at the borders or the sea ports, before the mail was delivered to the relative post office for its onward transmission. In 1845, the detailed Bill on Sanitary Authorities legalized the disinfection of mail arriving from countries in which there was an epidemic or they were suspected for an outbreak.

The great danger was coming from Turkey, Egypt, Danubian Principalities and Russia with large Greek minorities and extended commerce, as Greece represented an intermediate step for the Western Europe and vice versa.

By the increase of communication due to technology (Austrian Lloyd introduced iron ships in 1852 and screw-steamships in 1853) and, consequently, the direct calls to Eastern Mediterranean ports by the Westerners, the epidemic diseases of plague and, after 1850s, cholera, were directly spread to Europe either by sea lanes (via Italy or France) or by land (via Russia, Germany, Italy, France), having as a result the special attention of Hellenic Sanitary Authorities for the postal arrivals from West as well.

The mail fumigation in Greece was abandoned in 1893, a decade after the discovery of cholera vibrio, and appropriate protection was considered the disinfection of the mail bags only.

The seals of the various temporary and permanent health offices and their depended maritime or terrestrial lazarets as well as the fumigation practices applied, are important postal history evidence for the establishment of the postal routes and the transportation means of a letter, in cases of postal markings' absence.

The presentation and description

1833-1950 An extensive and specialised collection expertly written up and mounted on 128 album pages (179 items), the collection is arranged in the following way with incoming foreign mail through land borders such as Amaliopolis, Taratsa, Fourka Derveni, Makrynoros and Vonitsa (15 pages), incoming foreign mail through sea ports including Syra, Piraeus, Corfu and Kalamai etc., plus mail fumigated on board French ships coming from both Ottoman & Western ports, additionally transit mail disinfected in Greece and showing both single and double disinfections (80 pages), domestic disinfected mail from the Poros Plague of 1937, Syra in 1842 and 1850, plus the Piraeus Cholera outbreak of 1854 (4 pages), mail originating from and disinfected at lazaret stations including Syra, Taratsa, St.George island and Spinaloga island (9 pages), the use of health stations and lazarets officials seals on general dispatch mail from Syra, Vostitsa, Marathonission, on postmasters mail from Serifos, Syra and Makronissos and on Official documents from Milos, Patra and Aktion (8 pages).

Highlights include one of two known covers with Amaliopolis Health Office seal, apparently unique cover with disinfection slits from Amaliopolis Health Office, the unique cover with Fourka Sanitary Compound seal, unique usage of the Makrynoroplus Health Office, the only items from the Poros plague, only recorded letters from the Tararsa & St.George lazaret office, one of two recorded Spinalonga Lazaret cachets, one of three known seals of Vostitsa, Marathinission seal only two recorded and both in this collection etc., plus many Greece/Austrian Levant combination usages, attractive balance lot of some 87 items additional unmounted covers, cards and documents, a truly amazing assembly and a lifetime achievement in this most interesting of subjects (more than 260 covers, cards & or documents)

We would like to thank everyone who participated in our Summer Auction Series for helping to make it the success that it was. A special thanks to those collectors and dealers who came to our Geneva office in person to view and bid on the lots.

Our next auction series is scheduled next autumn in December, and we already have the foundations of what looks to be an excellent sale.

David Feldman prides itself in establishing top prices for both single rarities and entire collections. We are always looking for valuable single stamps, specialised collections and inherited estates. We only sell properties consigned by third parties, and for that reason, every vendor can be assured that our interests are aligned to achieve the best possible result. We are willing to travel anywhere in the world to discuss larger holdings in the comfort of your own home. Our experienced philatelic experts are well versed in all areas of philately.

If you have any valuable philatelic items that you would like to consign, then please do not hesitate to contact us.
