*Type I.*

*Used example with extra row  
of vertical perforations.*

1867-69. Second Issue.

2pi. deep to pale blue.

Reconstruction of the four types  
in deep blue.

**2 Piastres**

**Type 1**  
 a. The obelisk is larger and shorter than in the other types.  
 b. A coloured spot in the white oval just below the Sphinx.

**Type 2**  
 a. Letter P at top left is centred to right.  
 b. Shaded side of pyramid is narrower than in T. 1 and 3.  
 c. The base of the Ionic column is short.

**Type 3**  
 a. The left hand pyramid base is further away from oval than other types  
 b. The base of the obelisk is narrower than the other types.  
 c. The white oval enlarges below the Sphinx.

**Type 4**  
 a. The shaded side of the pyramid is as narrow as in T.2.  
 b. The summit of the pyramid does not touch the oval frame line.  
 c. The base lines below the pyramid are equidistant from oval frame line  
 d. At bottom label, first Arabic letter 'nun' rests upon the inner frame line.

Illustration from the Balian Catalogue  
showing the differences in the four types.
