- No. 49 " " " " " " " "
- No. 50 Tache blanche entre l'étoile et le croissant.

1867.

Plate II

Setting III

Block P. The following irregularities noted in Block P of 1865 again recur here :- 12. S. frame missing. - 23 align-ment low - 32 + 42 both out of alignment with 33 + 43. - S. frame of 23 is here intact but in 1865 almost entirely missing. The following star + ray defects occur in 1865 as also here :- 2. S.W. point broken - S.E. point short - 4. S.E. point short - 13. S.E. point short + somewhat deformed - 33 + 43. S.E. point short - 43 flaws below centre in 12 rays agree. - Also a slight projection at S.W. corner of N^o 3 definitely agrees. ¹¹ Yardley concludes that these 2 blocks are P. Settings but taken from different transfers of a primary P. Mould (or master plate) - These facts point to a plate of possibly 150 made up of 3 transfers of a P. Setting of 50. -

10 Paras. grey-green.
