The Principality of Romania - 1866 Prince Carol the 1st "with whiskers" issue

- The 2 parale stamp on thin paper (issued August the 8th, 1866) - the printing stones -

According to the Romanian researcher Kiriac Dragomir, four different printing stones are known for the 2 parale stamp ("Mărcile postale clasice românești litografiate în perioada 1865 - 1872", București, page 38), but this is no guarantee that more stones could have existed. All of these four stones have been used for printings on thin paper. As far as settings are concerned, of the four different stones known, only two have provided enough study material from their annexes for their exact settings to be determined. The existence of the other two stones has been determined through specific plate flaws, varieties and retouches. Multiples from the annex of any printing stone of the 2 parale on thin paper are generally quite rare.
