Broken left hand duty tablet at north-east diagonal arm.

Because the 3 warrants from which the 5d value were surcharged are all dated prior to 1908 the associated Head Plate must be Head Plate 2 as only that Head Plate was used in combination with Duty Plate 4 prior to 1910.

An oddity

**The enlargement shows a “white line” on the stamp
It would seem that a “hair” was present on the paper when the stamp
was printed and it remained there when the surcharge was applied
and indeed when the stamp was cancelled in Tangier.**

The impression left by the now missing “hair” can be clearly seen.
