CANTONAL ADMINISTRATIONS

ZURICH.

These stamps are
probably forgeries

This stamp ???

After Great Britain, the canton of Zurich was the second country in the world to issue postage stamps, a 4 centime intended for local mail and a 6 centime for letters to be exchanged within the canton. These stamps were not valid for the prepayment of postage on letters destined for other parts of Switzerland as well as abroad.

Issued 1. March 1843.

Designed by:- Esslinger.

Printed by lithography in sheets of 100 by the firm of Orell, Füssli and Co., of Zurich.

The design of the picture subject was executed five times and the five original stamps arranged in a row. This 5-stamp group was then copied 20 times on to the lithographic stone (plate). Therefore there exist 5 different types of what are known as "Zurich 4" and "Zurich 6" stamps.

Stamps Imperforate.

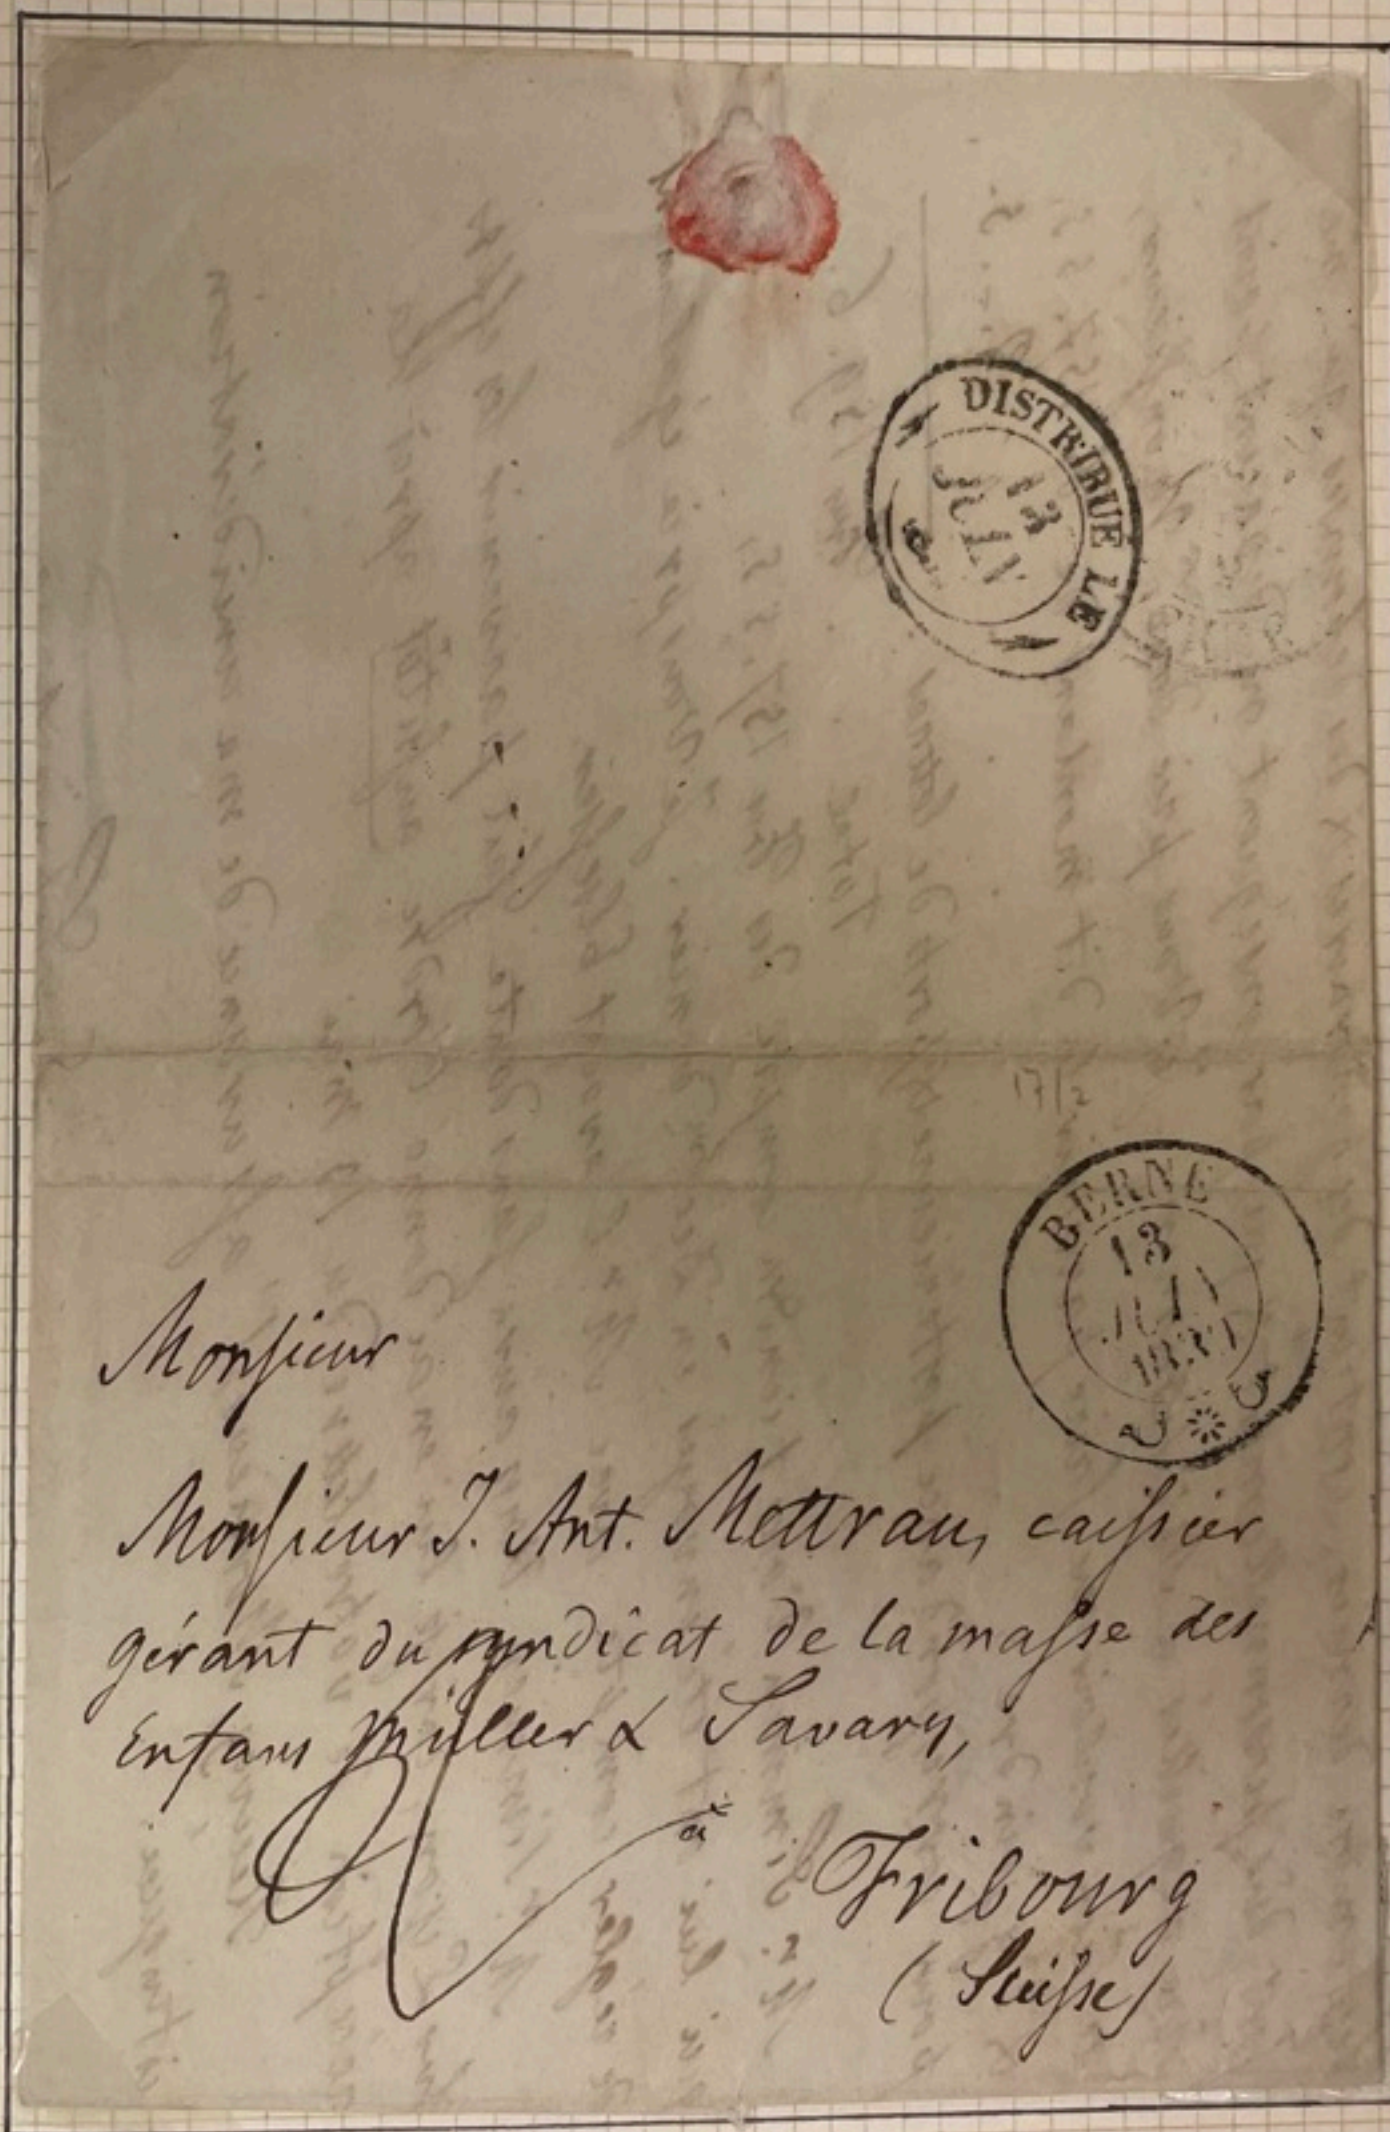

ZÜRICH 1843

Rekonstruktion eines 100er-Blattes der «Zürich 6» von 1843
Reconstitution d'une feuille de 100 pièces du «6 de Zurich» de 1843

A post-card published by the Swiss P.T.T. Museum showing an almost complete re-constructed sheet of the «Zürich 6». The stamps are part of the permanent display to be seen at the P.T.T. Museum in Berne.

FEDERAL ADMINISTRATION

Until January 1, 1849, the postal services were carried out by the Cantonal authorities. The Federal Constitution of 1848 stipulated that postal services would be administered by the Confederation and so after a short transitional period, it was decreed on April 5, 1850 that Federal postage stamps should be issued.

The first Federal Post Office Act provided for the division of the Swiss territory into eleven postal regions. It fixed three distance zones (Rayons) for letters and introduced a local rate as well. The first two stamps issued in May 1850 by the Confederation were 2 1/2 Rp "ORTS POST" and "POSTE LOCALE" for German speaking and French speaking Switzerland respectively. These stamps were intended for prepaying postage on local mail in the larger towns.

For the three distance zones (rayons) stamps of 5, 10 and 15 centimes (rappen) were issued. The 5 and 10 centimes was issued October 1 1850. The 15 centimes January 1 1852, when the new postal rates came into effect.

RAYON (ZONE I) Up to 2 hours journey from point of origin to destination.

RAYON (ZONE II) Up to 10 hours journey from point of origin to destination.

RAYON (ZONE III) Over 10 hours journey from point of origin to destination.

The 2 1/2 Rp applied also to Zone I delivery of printed matter up to 15 grams.

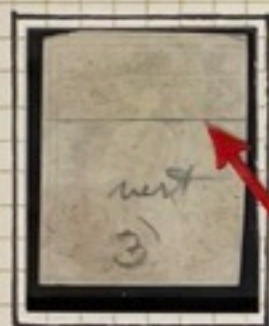

RATES:-	WEIGHT UP TO	ZONE I	ZONE II	ZONE III
	7 1/2 grams	5Rp	10Rp	15Rp
	15 grams	10Rp	15Rp	20Rp
	22 1/2 grams	15Rp	20Rp	25Rp
Printed matter	60 grams	5Rp	5Rp	10Rp

All stamps lithoprinted by M. Dutheim of Berne on unwatermarked paper.

Valid until September 30, 1854.

SITTING HELVETIA

1854-1862

Green Silk Thread.

This issue known as "Strubel" (wind swept) was first printed by The University Bookbindery of J.G. Weiss of Munich between 1851 and 1854 even though the stamps were not put into use until 1854. Beginning with the spring of 1854 further printing was carried out at the Federal Mint, Berne.

Designed and engraved by Friedrich Vogt of Munich.

Typographed on unwatermarked paper with silk threads crossing the stamps horizontally. The threads of the 1854 issue were all green; later in 1855 the colours were changed for each value. This proved too costly so it was decided to revert to the use of green thread throughout.

THE RAREST SWISS STAMP.

The next two items are translations of news items that appeared in the same issue of "Der Bund", on August 11.

In the whole world there exist only three postage stamps of which there is only one known specimen each, namely the 1 cent British Guiana 1856, the 3 Skilling Banco of Sweden 1855, and now the 5c. postage due stamp of Switzerland 1878 that was only recently discovered among the stock of a London stamp dealer. This scarcity could be seen from the end of June at the Ehrenhof of the Swiss National Philatelic Exhibition "Naba Zuri 84".

The figure "5" is surrounded by a star lined background that had otherwise exclusively been the case in the 1 c. value of the same set of stamps (the figure of the other values is printed on a plain white background). Whether there are other specimens of the misprint in existence is actually hidden in the stars. Singular in any case is the fact that it has taken over a hundred years to discover it.
