## **Example: Stereo Setting 1**

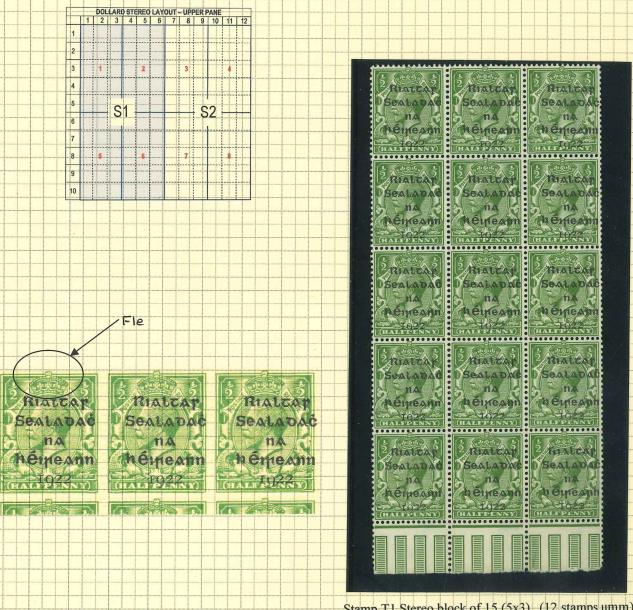

½d. Value - One complete stereo from one of four possible positions, being stereos 5, 6, 7 or 8.

Stereo shows damaged type to 'หเฉบ' of หเฉบอลุรั'

#### STEREO SETTING 1.

The first 3 x 5 matrix stereos were precisely taken from the engraved forme, resulting in very few recurrent variations between overprints. With this stereo type the 't' of 'Sealagac' is centred above the 'n' of 'na'.

Variations recorded are due to the inaccurate setting of stereos into the wooden sections or as a result of damage / wear to

Stamp T1 Stereo block of 15 (5x3). (12 stamps umm)

Fig. - Top left stamp in stereo shows cross bar / serif on 't'

and damage to tops of 'RIA'. (fm)

Cause of curvature damage not known, but recorded by owner with Thom overprints.

Overprint displays shift to the right.

Letter damage also noted in various positions.

## PROVISIONAL GOVERNMENT OF IRELAND

DOLLARD OVERPRINTS

Dollard produced stereos from a forme on three occasions, which gave rise to three Stereo Settings.

For a full sheet made up of two panes, each pane required 8 stereos, each stereo having 15 clichés; the clichés being set in a 3 x 5 matrix. The Dollard stereo layout for the upper & lower panes involved producing four wooden encased sections, each containing four stereos. Upper pane sections S1 (Stereos 1,2,5,6) & S2 (Stereos 3,4,7,8) and for the lower pane sections S3 (Stereos 9,10,13,14) & S4 (Stereos 11,12,15,16).

## STEREO SETTING 1.

The first 3 x 5 matrix stereos were precisely taken from the engraved forme, resulting in very few recurrent variations between overprints. With this stereo type the 'l' of 'Sealadac' is vertically above the 'n' of 'nA'.

Any variations recorded are therefore due to the inaccurate setting of the stereos into the wooden sections or as a result of damage/wear to the stereos.

Stereo Setting 1 - Stamp T1 - 1/2d. Value - Two complete stereos from positions 1 & 2.

Stereo Setting 2 - Stamp T1 - 1/2d. Value

This setting displays consistent variants due to 'slip' of the monotype forme prior to the production of the second batch of stereos.

Setting 2 shows six 'R/Se' varieties in each 3 x 5 stereo of 15 clichés and in addition several other alignment variants.

## STEREO SETTING 2. (3 x 5 Stereo)

Minor flaws due to damage/wear to the type face:

- R16/9 'R' of 'Rialtas' almost missing.
- R18/9 Breaks in first 'a' of 'Sealadac' and 'a' in 'héireann'.

Stereo Setting 2 - Stamp T1 - 1/2d. Value

Stereo Setting 3 - Stamp T2 - 1d. Value

Stereo Setting 3 is similar to Setting 2, but shows additional variants due to 'slip' of the monotype forme, prior to the production of the third batch of stereos.

Setting 3 shows eight 'R/Se' varieties in each 3 x 5 stereo of 15 clichés and several other alignment variants

| I / na*** | - 'I' of 'Sealadac' over 'nA'.                       |
| éi / 1    | - 'éi' of 'héireann' directly over '1' of '1922'.    |
| ir/1      | - 'ir' of 'héireann' directly over '1' of '1922'.    |
| Raised c  | - 'c' of 'Sealadac' raised above other letters.      |

RIALEAP - diagonal cut left upright in 'R' of 'Rialtas' and Sealabac 'n' of 'nA'.

MA

Stereo Setting 3 - Stamp T1 - 1/2d. Value

Stereo Setting 3 is similar to Setting 2, but shows additional variants due to 'slip' of the monotype forme, prior to the production of the third batch of stereos.

Setting 3 shows eight 'R/Se' varieties in each 3 x 5 stereo of 15 clichés and several other alignment variants.

## STEREO SETTING 3 (3 v 5 Stereo)

## **OVERPRINT VARIETIES**

## **OVERPRINT VARIETIES**

Item displayed on the right, acquired October 2010.

It is obvious that the collector was a serious philatelist, with knowledge beyond that of an average collector.

Also of note is the clear and precise handwriting, which is not uncommon with display sheets prepared before the advent of computers.

As an exercise I decided to review the unknown collectors findings and rewrite in terms of the writers 'Compendium.

A) Two corner positional blocks arise from the use of the Dollard Stereo , Setting 3. Row 1/19 & Row 1/20.

Both examples display the varieties V1a - 'R' over 'Se' (R1/19) and V1i - "R' over 'Se' & 'c' in 'Sealadac' raised.

B) Used block of ten stamps, display part of two Dollard Stereos, both Setting 2

| V1k | V1a |            | V1k | V1a |

Stereo A

Stereo B

#### Varieties & Flaws

V1a - 'R' over 'Se'

V1h - 'R' over 'Se' & 'c' in 'Sealadac' raised

V1k - 'l' over the left shank of 'n' in 'nA'

V1j - 'R' and 'n' with diagonal cuts to left uprights

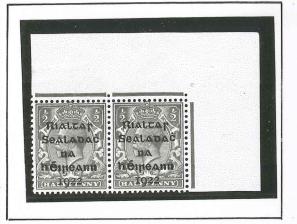

F1h - Broken 's' in 'Rialtas' and almost missing dot over raised 'c' in 'Sealadac'

OAP Overprints on Stereo A out of alignment compared with Stereo B, resulting in two 'out of alignment pairs'

As will be noted the revisit by Barry Cousins in 2010, produces some significantly different conclusions.

As a point it is also considered that the term 'Plate' should only relate only to the printing of sheet of stamps and not the overprint stereo in the case of Dollard, or the overprint setting in the case of Thom.

In the case of the overprints, the term Setting should be used.
