 9x10
 P. about 10.
 (9) Small-hole perf.
 This variety is of the greatest rarity. The copy perf. 10 came into my hands in 1916, and I was inclined to doubt whether it was really a separate recognisable variety, or whether the holes were merely smaller than usual. This copy perf. 11x9 sets the matter at rest; the stamp ought to appear in the catalogue as 1214. It now does.
 (Sold to me by S.G. Ltd. 28/7/19.)
 I believe these to be the only known copies.
