T55 / V9aa - Overprint from Setting 4 with rare raised second 'A's' of 'SAORSTÁT' in stamps from R2/2 & R2/4

The variety occurrence with stamp R2/2 is the rarity, which was explained by Roy Hamilton-Bowen as being an early substitution of the cliché, which subsequently showed the dropped '2' flaw. Hamilton-Bowen attributes the overprint setting as 3, however from the author's standpoint it could be from setting 4.
