Precancelled Control Stamps of Tirol (Austria)

By Dr. William E. Engelhardt,
Berlin, Germany

After World War I, from 1919-1921, the government of the Tirol in Austria, put into effect a control of all parcels being shipped abroad. This control was on valuables, foods and other articles whose exportation from the country had been forbidden. At the beginning the control fee was 20 Heller which was later increased to 50 Heller. The payment of the fee was attested by special control stamps with a denomination of 20 Heller (Fig. 1) which later were surcharged "50 Heller" when the fee was increased (Figs. 2 & 3). These stamps were affixed to the parcels.
