GHANA

Le GHANA (239 000 km² - 11 300 000 hab. - cap. Accra) l'ancienne colonie britannique de Gold Coast (côte de l'or) est situé dans le "talon" intérieur de l'Afrique et limitrophe de la Côte-d'Ivoire, du Togo et de la Haute-Volta. Il a reçu son nom actuel en souvenir d'un Etat primitif qui existait entre 800 et 1076 après J.-C. entre les fleuves du Niger et du Sénégal. Les marchands portugais établirent des relations commerciales dans cette zone en 1471. La domination britannique commença à s'exercer en 1820 mais ne fut fermement établie qu'en 1901. Le Ghana obtint son indépendance le 6 mars 1957. Le premier ministre, Kwame Nkrumah fut renversé en 1966 et trouva refuge en Guinée où il fut considéré comme "président honoraire". Le Ghana est l'un des premiers pays du [illegible] de cacao et de diamants industriels.

25e ANNIVERSAIRE DU COURONNEMENT 1953

Le Cheval Blanc des armoiries de Hanovre a été apporté à l'Angleterre lorsque George, Electeur de Hanovre, descendant des Stuarts a réclamé à la mort de la Reine Anne, le trône de Bretagne. La France a adopté le coq pour emblème national après la victoire, en 1665, de ses troupes sur les Espagnols qui assiégeaient Le Quesnay.

25th ANNIVERSARY OF THE CORONATION 1953

White Horse of Hanover was brought to England when George, Elector of Hanover, on the death of Queen Anne, claimed the throne of Britain through his Stuart descent. After France defeated the Spaniards in 1665 at the siege of La Quesnay, she adopted the Gallic Cock as a national emblem.

The Black Dragon of Ulster at Windsor supports the arms of the Earls of Ulster. The right to these arms helped prove for Richard Plantagenet the Yorkist right to the throne. The Sea Lion supports the arms of the old (London) East India Company which used St. Helena extensively as a port of call.

The Panther of Yorkist Henry VI on the roof of St George's Chapel Windsor, supports the shield of Eton College, one of the educational foundations of a king more noted for his piety than his skill at arms. The Fur Seal, with its thick coat is perfectly adapted for life in the Antarctic region.
